

SparkScan1 High Voltage Clamp New Protective Hose

With production starting in November 2024, MOTORTECH will equip the SparkScan1 high voltage clamp with a new protective hose for the coaxial cable used.

Instead of the previously used gold-coloured protective hose, a black, silicone-coated glass fibre hose will be used from now on, which allows even more flexible working with the high voltage clamp due to its smaller diameter.

Like its predecessor, the new protective hose has high thermal insulation and dielectric strength. The original technical data of the SparkScan1 high voltage clamp remains unchanged.

ORDERING INFORMATION

SparkScan1 High Voltage Clamp

P/N	Description	Cable Length
06.90.090-02000	SparkScan1 high voltage clamp	2.0 m

SparkView – High voltage indicator

P/N	Description
06.90.099-150	SparkView high voltage indicator, incl. SparkScan1 high voltage clamp P/N 06.90.090-02000 (cable length 2.0 m) and carrying case, for use with spark plug leads
